

# Private wireless AP management and support

## Overview

CommScope offers a broad portfolio of RUCKUS® private wireless (PW) access points (APs) for indoor and outdoor environments. These APs utilize Citizens Broadband Radio Service (CBRS) spectrum to deliver superior wireless performance, security, mobility and range in challenging enterprise settings.

Access management provides a cloud-based user interface to manage the private wireless APs, plus automatic software updates and technical support, all for a low annual fee.

## HIGHLIGHTS

### PRIVATE WIRELESS AP MANAGEMENT PORTAL POWERED BY DMS

The private wireless AP Management's easy-to-use interface configures and manages APs and provides a powerful, cloud-based platform for day-to-day network operations and monitoring

### SOFTWARE UPDATES

We're always adding and enhancing features to our private wireless solution. AP Management includes scheduled maintenance releases and major software updates.

### TECHNICAL SUPPORT

Private wireless AP Management includes access to highly qualified CommScope support staff. Inbound service requests are routed automatically to a specialized customer support team.

## PRIVATE WIRELESS AP MANAGEMENT PORTAL

- Powered by CommScope's Device Management System (DMS)
- Supports unique CBRS requirements such as quickly capturing AP coordinates via internal or external GPS antenna, facilitating SAS service and enabling sign-off by a certified professional installer (CPI)
- Enables FCAPS (fault, configuration, accounting, performance, security) management
- Features a comprehensive dashboard view of network health and performance
- Hierarchical view supports large, multisite deployments
- Offers a graphical floorplan view with drag-and-drop AP placement
- Includes integrated maps to easily calibrate AP sites and observe the status of multiple venues in a single map view
- Provides alarm viewing, sorting, and clearing by severity
- Delivers key performance indicator (KPI) analytics and reports

## SOFTWARE UPDATES

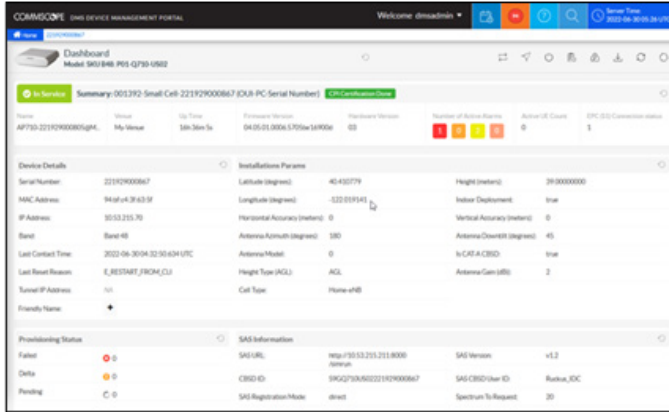

- Regular software maintenance and enhancements for PW APs and PW AP Management for worry-free operation

## TECHNICAL SUPPORT

- 24x7 phone/chat/web technical support
- Access to the CommScope Technical Assistance Center

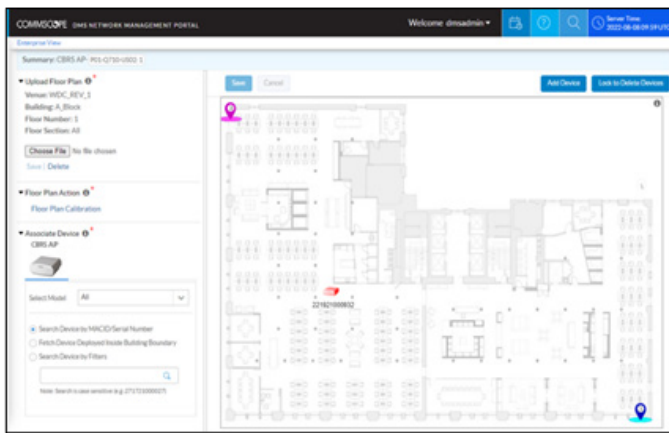

## PRIVATE WIRELESS AP MANAGEMENT SCREENSHOTS

These screenshots highlight the intuitive interface and rich information available via the private wireless AP Management portal.

### Dashboard

The dashboard delivers a clean summary of critical network information plus easy access to detailed information and configuration capabilities.

### AP placement in venue

Easy-to-use integrated floor plans make it easy to track AP placements and visualize coverage areas.

### Key performance indicators

Comprehensive KPIs provide an at-a-glance view of current conditions as well as historical performance trends.

## ORDERING INFORMATION

Part Number	Description
CLD-DMS-1001	LTE access point management, one-year license for one AP. Includes DMS cloud management access, software upgrades and technical support.
CLD-DMS-3001	LTE access point management, three-year license for one AP. Includes DMS cloud management access, software upgrades and technical support.
CLD-DMS-TRL	LTE access point management, six-month trial/demo license for one AP. Includes DMS cloud management access, software upgrades and technical support.
