

Transitioning Veterans Program

- CommScope strongly supports United States service members and their families. One of the ways we show our support is by offering free wireless training to recently separated service members and their spouses who want to enter the world of wireless communications.
- CommScope is proud to have the Transitioning Veterans program in place to offer training to qualified service members and their spouses, during their military to civilian transition, who have a desire to work within the wireless business and who meet certain requirements. They can complete a variety of courses and even become certified for free by attending and completing the requisite training classes on CommScope's DAS, Small Cell, CBRS and Repeater solutions.
