

Built for sustainability

Propel™ high-speed fiber platform

CommScope's Propel portfolio is designed with sustainability for packaging, labeling and installation to eliminate waste and pollution. Propel products are made to last, so they don't have to be replaced often. It's all part of our goal to reduce our carbon footprint across our operations, products and supply chains.

Recycled packaging

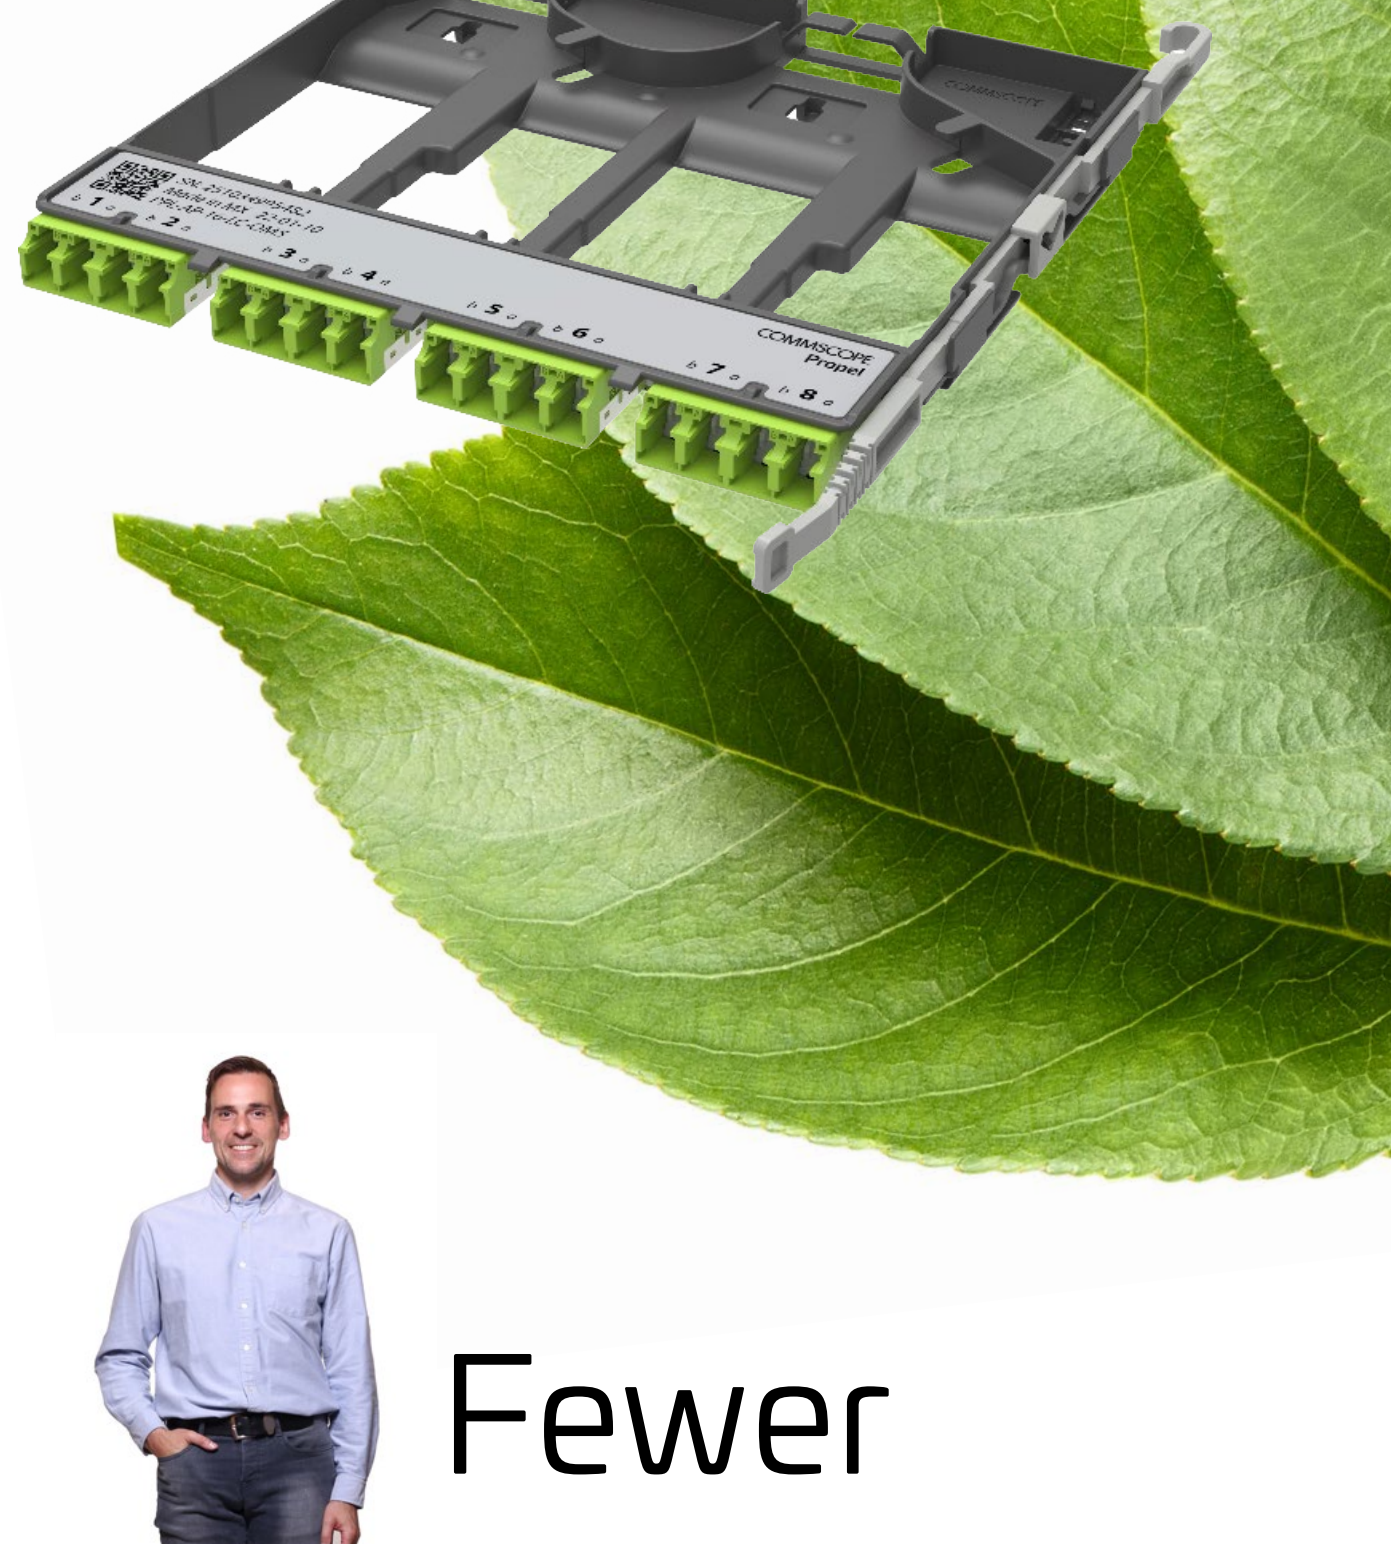

Supplier sustainability

Conflict-free minerals

Better packaging

- ✓ Minimal single-use plastics in panel packaging
- ✓ Recycled cardboard
- ✓ Foam is recycled and recyclable
- ✓ No single-use plastics in module packaging

Less waste

Unique QR codes let field technicians get everything they need electronically—from specifications and installation instructions to schematics and test results.

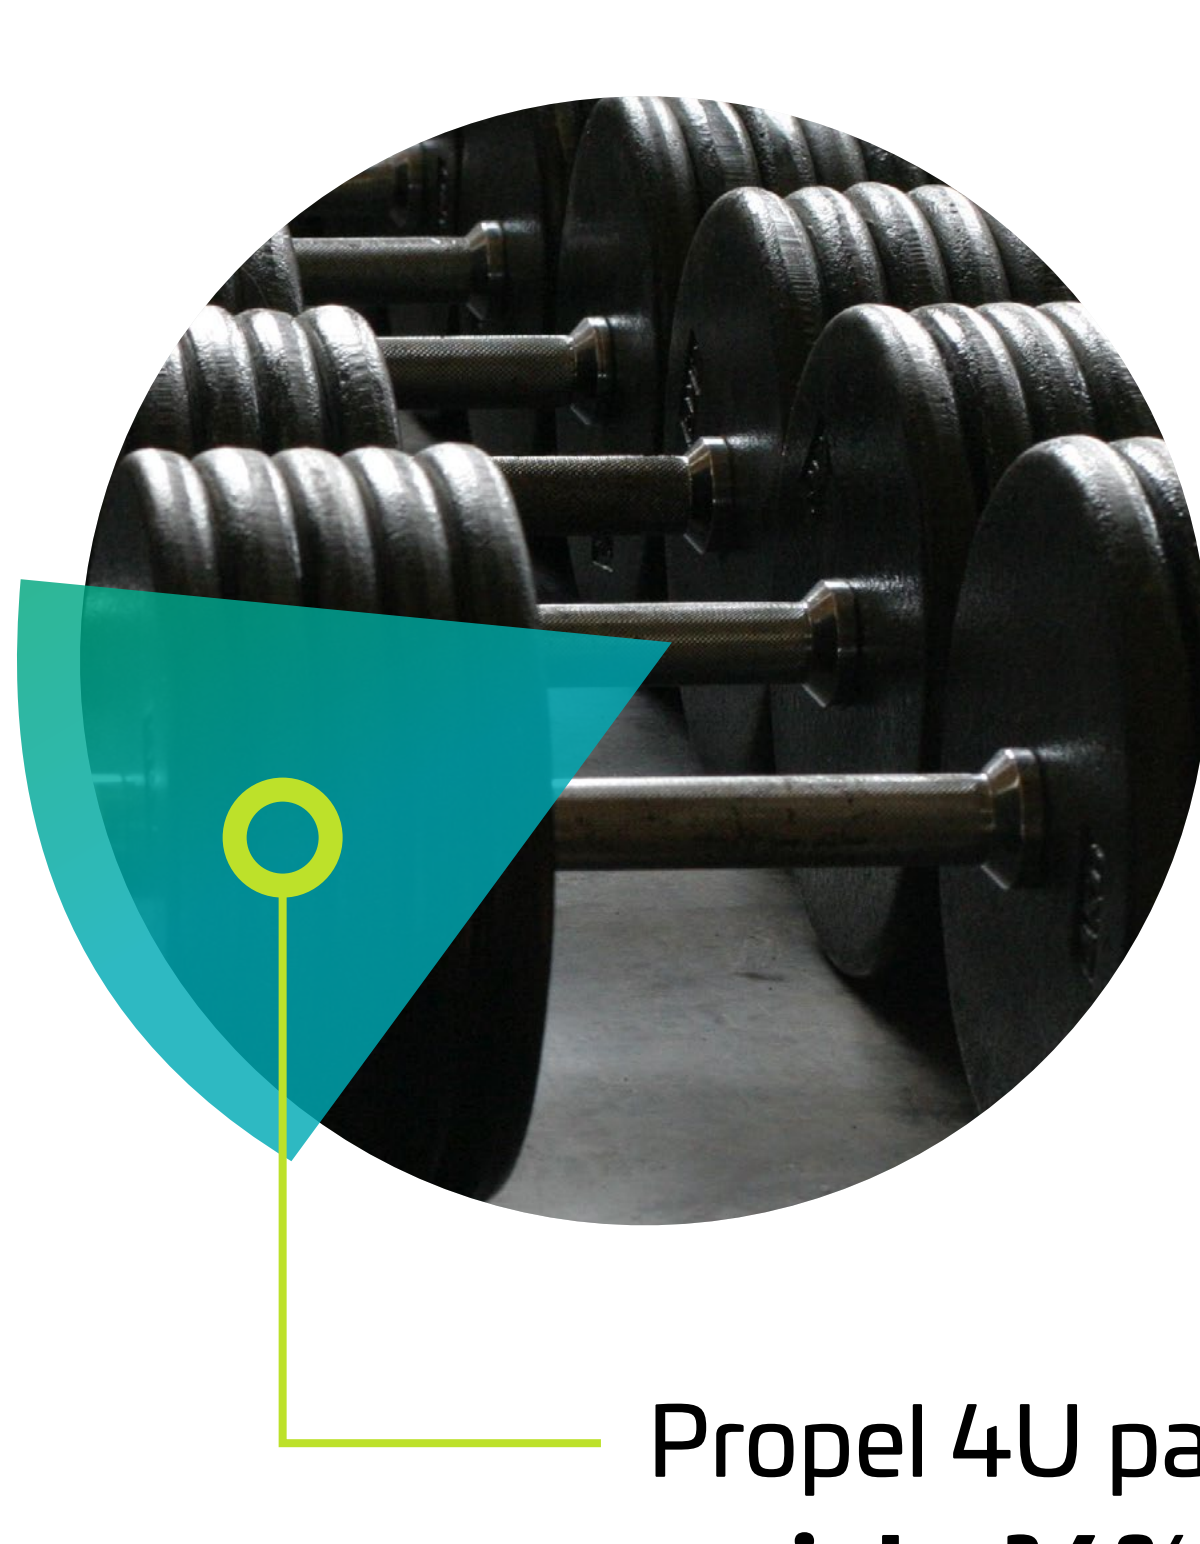

Fewer resources required

One technician can install Propel products, thanks to a self-supported rack-leveling design.

Greener transportation

Propel 4U panel packaging takes up **20% less space** than other typical panels

Propel 4U panel packaging **weighs 16% less** than other typical panels

Responsible sourcing

We source conflict-free minerals for Propel products and expect our suppliers to follow the same standard.

Longer-lasting products

Our Propel portfolio stands the test of time, so customers can enjoy them longer.

- ✓ Flexible, adaptable blades
- ✓ Interchangeable modules and adapters
- ✓ Supports variety of fiber types and connectors

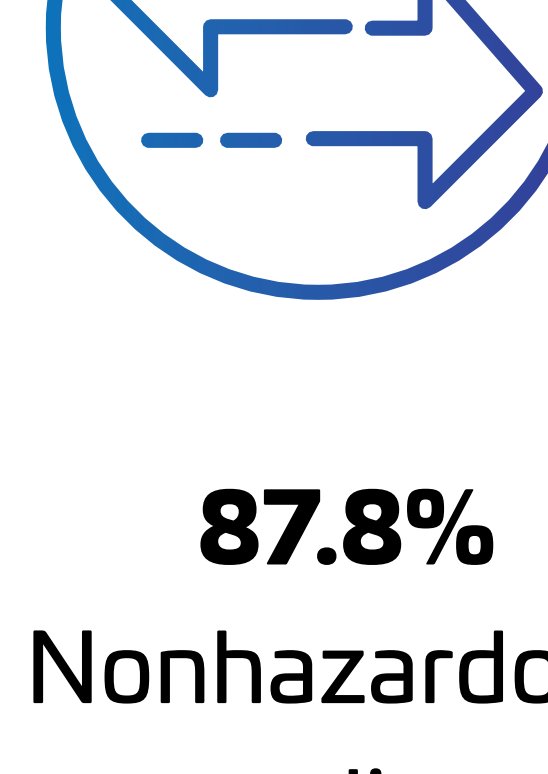

Environmental progress with promise

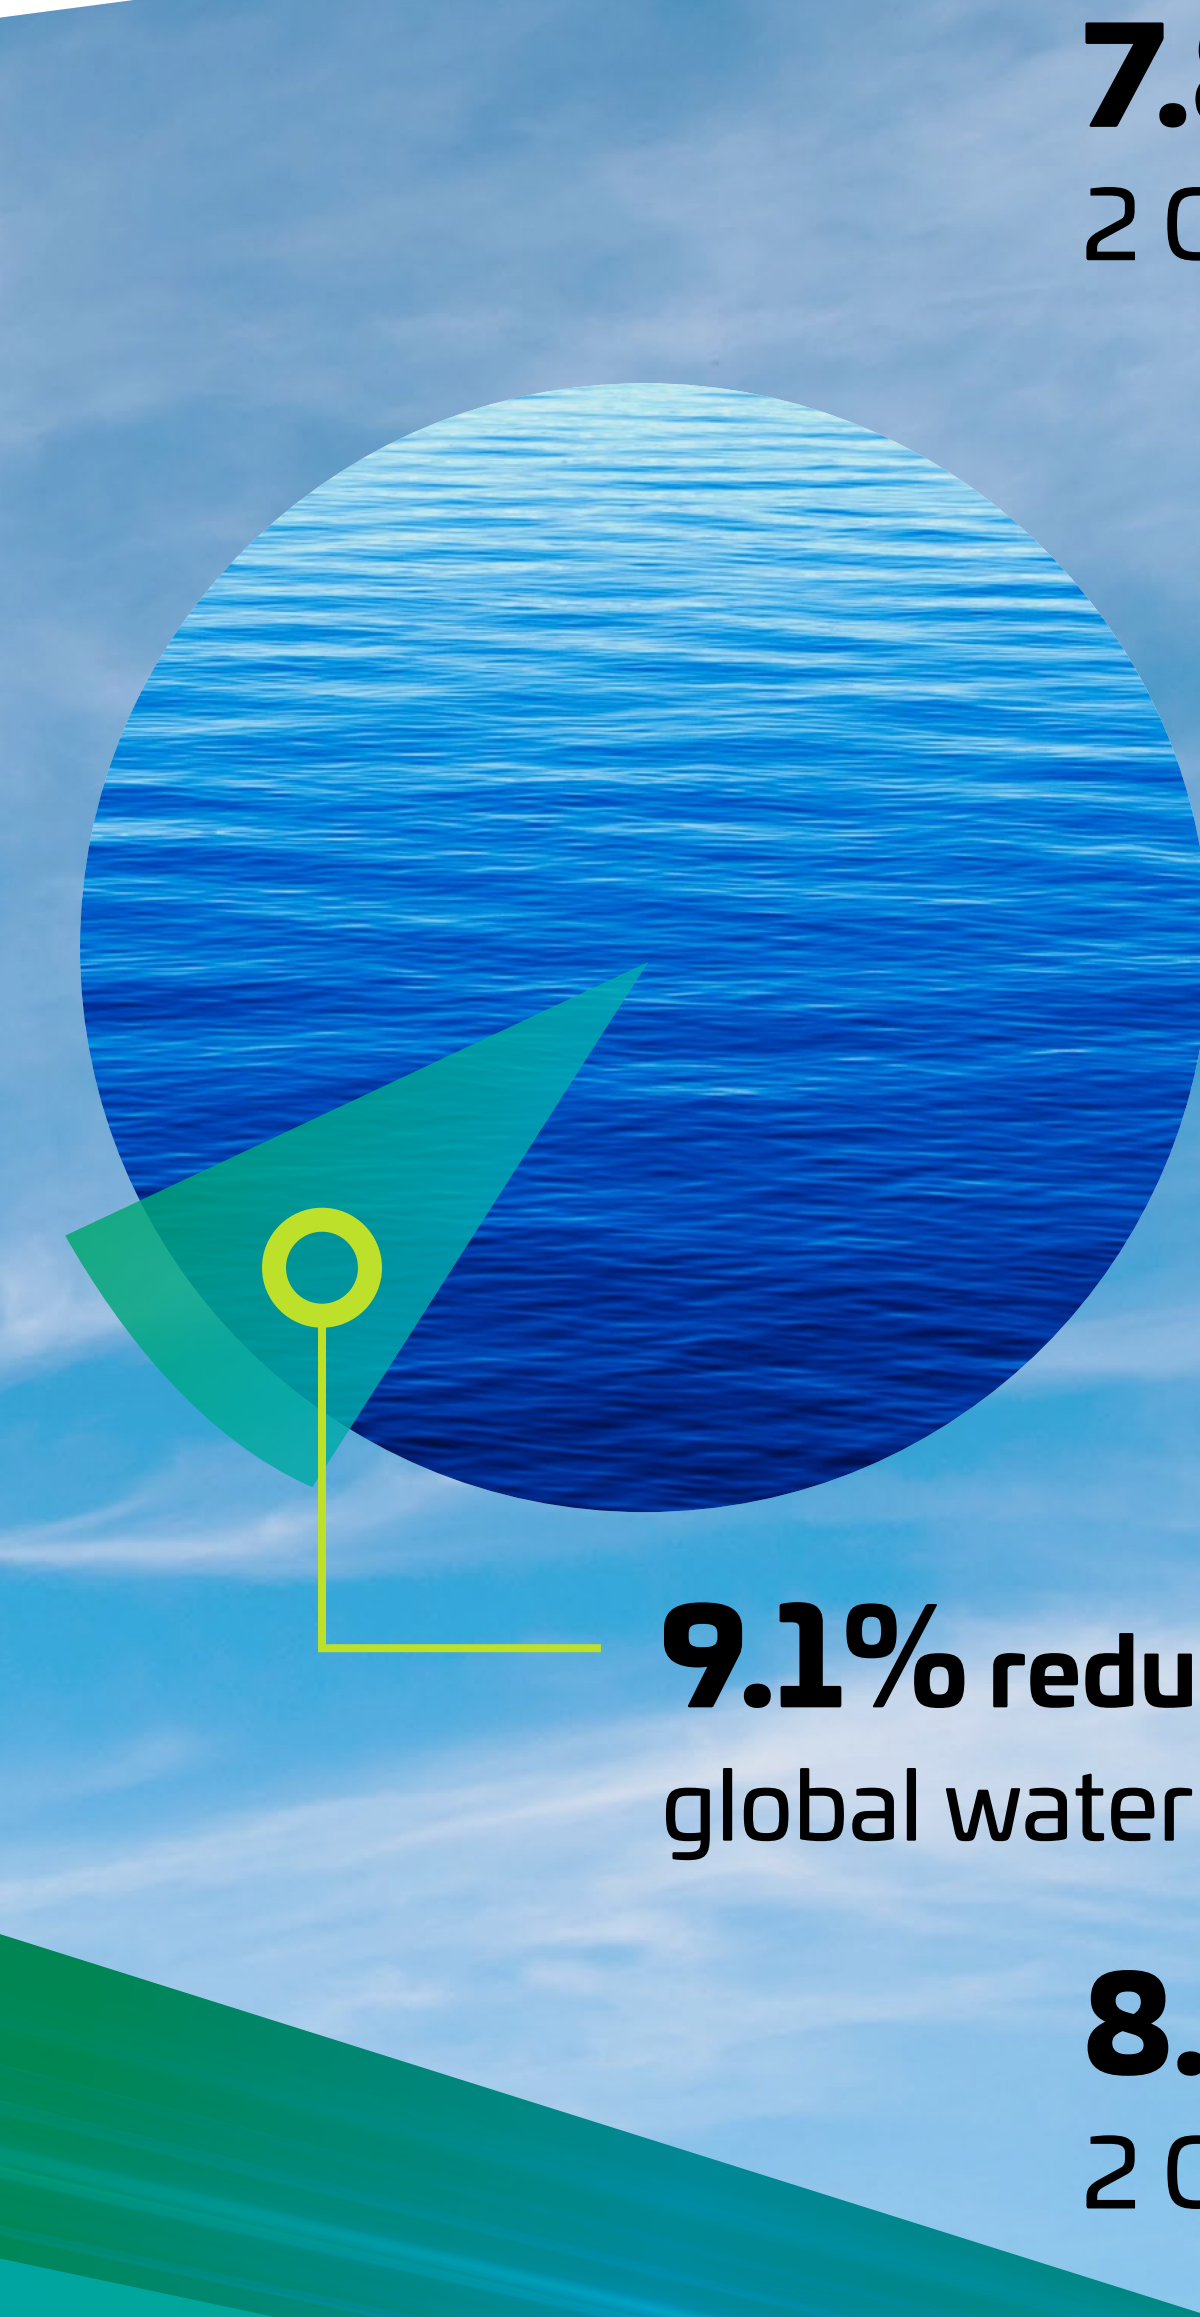

100% certified Manufacturing facilities ISO 45001:2018 Health and Safety Management Systems

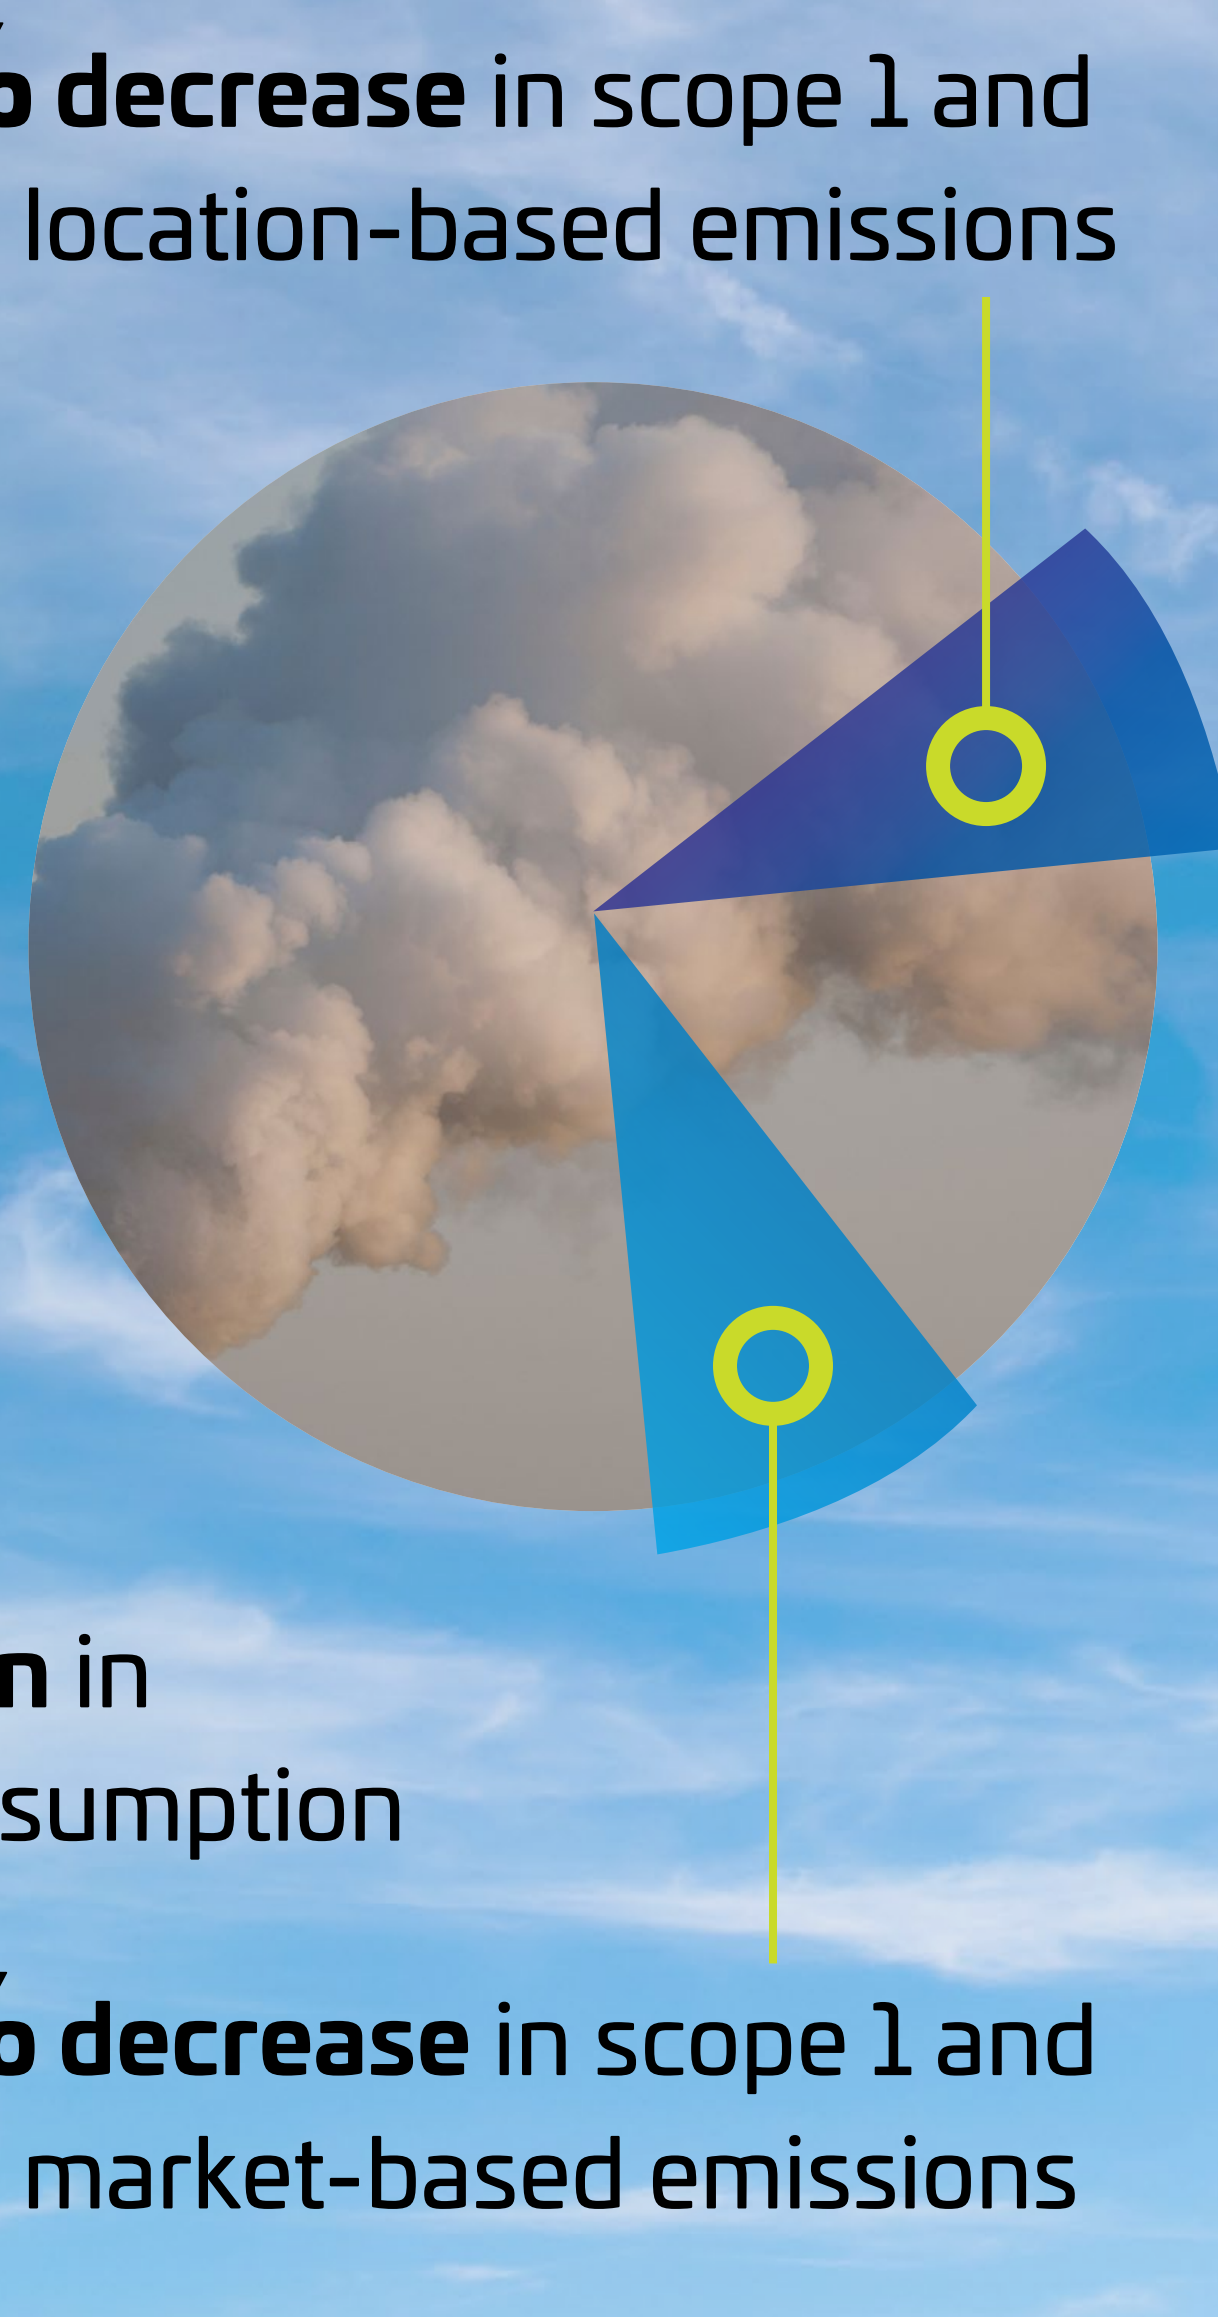

100% certified Manufacturing facilities ISO 14001:2015 Environmental Management Systems

87.8% Nonhazardous waste diverted from landfills globally (2021)

9.1% reduction in global water consumption

7.8% decrease in scope 1 and 2 CO₂e location-based emissions

8.9% decrease in scope 1 and 2 CO₂e market-based emissions
